

GYN/OB Patient Tracker

The purpose of the Patient Tracker is to ensure that each student is exposed to the depth and breadth of Obstetrics and Gynecology. After week 3 of the rotation, please check your log and ask your attendings/residents to assist you in meeting your requirements.

Each student is required to log at least one patient with each of the following problems:

Problem

- Abnormal Labor
- Antepartum Visit
- Breast Health
- Contraception
- Diabetes in Pregnancy
- Dysplasia
- Ectopic Pregnancy
- First Trimester Bleeding
- Hypertension in Pregnancy
- Menstrual Disorders (eg. Abnormal Uterine Bleeding, PMS)
- Pelvic Pain
- Perimenopause/Menopause
- Peripartum Infection
- PID
- Pre-term labor
- STD
- Term Labor
- Vaginitis

** remember, an individual patient may have more than one problem.*

Each student is required to log two patients whose procedures the student has either performed or assisted (except hysterectomy – may be 2 abdominal, 2 vaginal or one of each)

Procedure Performed:

- Bimanual Pelvic Exam
- Breast Exam
- Cervicovaginal Cultures
- PAP Smear
- Sterile Speculum Exam
- Vaginal Delivery
- Well Woman History/Exam – Perimenopausal/Menopausal
- Well Woman History/Exam – Reproductive Age
- Wet Prep

Procedures Assisted:

- Abdominal Hysterectomy
- Cesarean Section
- Colposcopy
- Laparoscopy
- Tubal Ligation
- Vaginal Hysterectomy
