

Ob Conference Schedule

1. **Monday** morning Team Improvement rounds after signout - Reviewed prior week's opportunities and achievements. Followed by weekly memo outline sent to attendings, charge nurses, and nurse management
2. **Monday** morning 8am Genetics Review (30-40 mins) - Beth from PDC gives a wonderful talk on 1st trimester screening. She would be willing to do this every other week or so (scheduled in advance), and if any other counselors were willing to come over to L&D, we could probably do this every week.
3. **Monday** noon – alternates between Prenatal Diagnostic Center (PDC) interesting cases conference (2nd & 4th weeks, Jones room in Phipps) and Ob/NICU conference (1st & 3rd weeks, NICU offices conference room).
4. **Tuesday** morning 8am Strip Rounds (45 mins) – Please be sure to ask Dr. Blakemore if she is available the week before. Otherwise, the other MFMs are usually willing to conduct this conference (ask them). OB Ultrasound Intern should be reminded to come too.
5. **Wednesday** morning 8am NICU Rounds (30 mins) - Discuss with the NICU fellow sometime Sunday through Tuesday, prepare list of OB history to email out to potential attendees (NICU/OB fellows, OB attending, ultrasound techs, etc.). Confirm with page the night before and morning of rounds. Go to NICU on Wednesday mornings (barring any emergencies in NICU or L&D) and review progress/findings/pathophys/treatment issues with the NICU fellow and OB team.
6. **Wednesday** 1-3PM – PDC conference – Jones Room
7. **Wednesday** 3:15 PM – MFM conferences – Woodruff lecture hall
8. **Wednesday** 4PM – Sono conference – Woodruff lecture hall
9. **Thursday** afternoon review session (30 mins) - Can be Thursday morning, but works well in afternoon after PGY-2 cases -- either the attending or chief gives a short powerpoint talk on a basic topic, or chalk talk. Can also use this session for knot-tying reviews, suture/scalpel blade review, and other topics that come up throughout the prior week.
